

PHASE 1 – Creating a Custom Application

Employee Raise Issue – ServiceNow Project Documentation

Objective

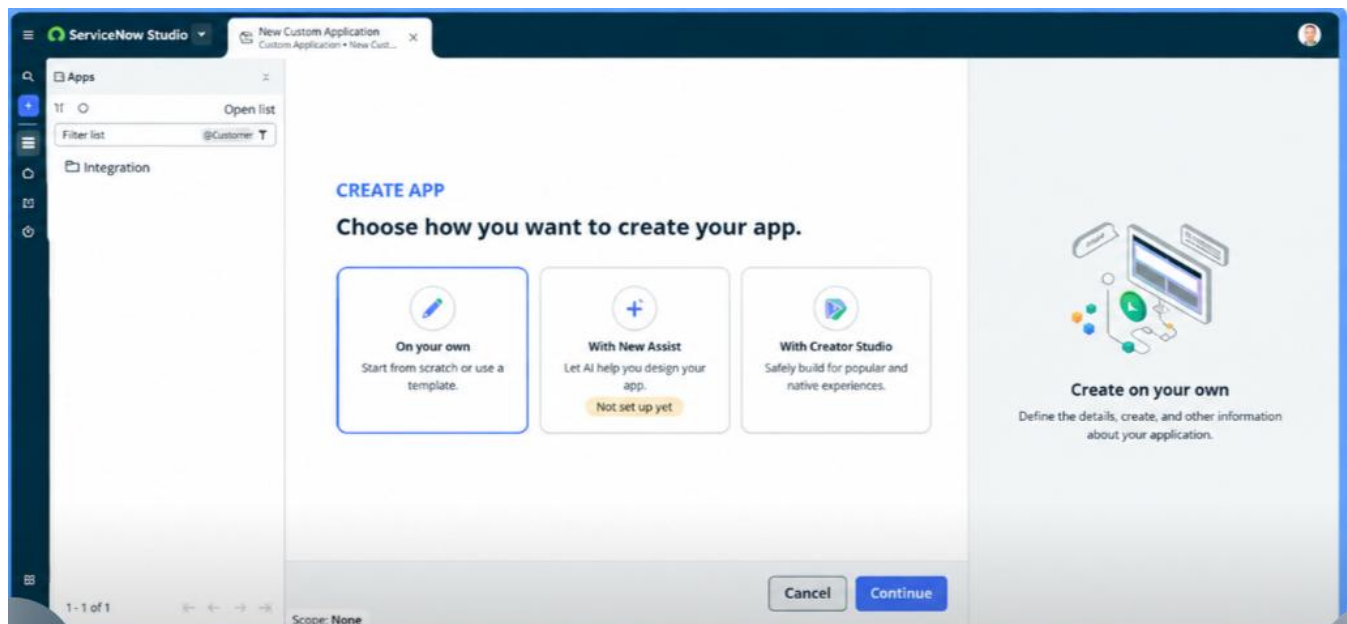

Create a custom scoped ServiceNow application that provides the foundation for the Employee Raise Issue solution.

1. Navigate to All menus → App Engine → ServiceNow Studio.
2. Click Create and select App.
3. Enter the application details:
 - Name: Employee Center
 - Scope: Scoped
4. Click Continue.
5. Return to the ServiceNow home page and reload the instance.
6. Verify that Employee Center appears as the current application.

Expected Result

The custom Employee Center application is created successfully and is available as the current application scope.

1: ServiceNow Studio – Create Application

2: Application name and scope

The screenshot shows the 'New Custom Application' form in ServiceNow Studio. The form is titled 'CREATE APP' and 'Let's get started on your new app.' It prompts the user to 'Add a name and description that define the purpose of your app. You can also add a thumbnail image.' The 'Name' field is labeled 'Name *' and contains the text 'Employee center'. The 'Description' field is labeled 'Description' and contains the text 'Describe this app'. The 'Scope' section has two radio buttons: 'Scoped' (selected) and 'Global'. To the right of the form is a placeholder for a thumbnail image with the text 'Browse or drag to upload' and supported file formats: 'BMP, GIF, ICO, JPEG, JPG, PNG, SVG'. At the bottom right are 'Cancel' and 'Continue' buttons. On the left side of the interface, there is a sidebar with 'Apps' and 'it organization' sections.

3: Employee Center shown as current application
