

# PHASE 2 – Creating a Custom Table and Fields

## *Employee Raise Issue – ServiceNow Project Documentation*

### Objective

Create a custom table to store employee-raised issues and define the fields required to capture issue information.

### A. Create the Custom Table

1. Navigate to All menus → System Definition → Tables.
2. Click New.
3. Enter:
  - Label: Employee raises issue
  - Name: Allow ServiceNow to auto-populate the table name.
4. Under Controls, enable Auto number.
5. Save the form using the context menu.

### B. Create Fields

1. Open the Employee raises issue table.
2. Under Related Links, open Show Form.
3. Use Configure → Form Design.
4. Create the following fields:

Field: Number | Type: Auto-Number

Field: Requester | Type: Reference | Reference table: sys\_user

Field: Category | Type: Choice | Values: Network, Hardware, Software, Access

Field: Subcategory | Type: Choice | Values: VPN, Laptop, Server, Forgot password

Field: Short description | Type: String

Field: State | Type: Choice | Values: New, In progress, Resolved, Closed

Field: Priority | Type: Choice | Values: Critical, High, Medium, Low

Field: Assignment Group | Type: Reference | Reference table: sys\_user\_group

### Expected Result

The Employee raises issue table is created with all required fields and can store employee issue records in a structured format.

## 1: New table form

servicenow All Favorites History Workspaces Tables

Application scope: Employee Center  
Update set: Default [Employee Center]

Updated Search

All > Update name is not empty

| Label  | Name   | Extends table | Extensible | Updated |
|--------|--------|---------------|------------|---------|
| Search | Search | Search        | Search     | Search  |

## 2: Table controls with Auto number

servicenow All Favorites History Admin Table - Employee raises issue

Application scope: Employee Center  
Update set: Default [Employee Center]

Table Employee raises issue

\* Name x\_1955276\_employ\_0\_employee\_raises Remote Table

Columns Controls Application Access

Extensible ☐

Live feed ☐

Use auto-numbering to define a sequential identifying code made up of a prefix, a base number and a padding value to ensure a consistent format

Prefix EMP

Number 1,000

Number of digits 7

## 3: Completed Employee raises issue form

servicenow All Favorites History Employee raises issue - Create EMP...

Application scope: Employee Center  
Update set: Default [Employee Center]

Employee raises issue New record

Submit

Number EMP0001012
