

PHASE 4 – Creating a Record Producer

Employee Raise Issue – ServiceNow Project Documentation

Objective

Create a Record Producer that allows employees to submit an issue from the Service Portal and automatically create a record in the Employee raises issue table.

1. Navigate to All menus → Service Catalog → Catalog Definition → Record Producers.
2. Click New.
3. Enter:
 - Name: Raise Employee Issue
 - Table: Employee raises issue
 - Description: Add a suitable description of the issue submission process.
4. In Accessibility:
 - Catalog: Service Catalog
 - Category: Service
 - Picture: Upload/select an appropriate image.
 - Meta name: Use the table name as required.
5. Save the Record Producer.

Create Variables

1. Under Related Links, open the Variables section and click New.
2. Create variables based on the Employee raises issue table.
3. Enable Map to Field.
4. Select the corresponding target field.
5. Assign orders such as 100, 200, 300, 400, 500.

Variables

1. What is the Requester name?

Type: Reference

Reference: sys_user

2. Which Category?

Type: Choice

Values: Network, Software, Hardware, Access

3. What is Subcategory?

Type: Choice

Values: VPN, Laptop, Server, Forgot password

4. Which State is this issue?

Type: Choice

Values: New, In progress, Resolved, Closed

5. Short description

Type: Single Line Text / String

Save the Record Producer.

Verification

Open the ServiceNow instance in a new tab and use the Service Portal URL with the /sp suffix. Search for the relevant table/catalog item and verify that the Record Producer is available.

Expected Result

Employees can enter issue details through the Record Producer, and submission creates a corresponding record in the Employee raises issue table.

Record Producer form

The screenshot displays the 'Record Producer' configuration interface for a 'Raise Employee Issue' form. The top navigation bar includes options like 'Copy', 'Try It', 'Update', 'Edit in Catalog Builder', and 'Delete'. A blue banner at the top states: 'Build and modify items faster with the improved Catalog Builder.' The form configuration section includes fields for 'Name' (Raise Employee Issue), 'Table name' (Employee raises issue [x_1955276_employ...]), 'State' (None), 'Checked out' (None), and 'Owner' (System Administrator). The 'Application' is set to 'Employee Center' and 'Active' is checked. Below this, there are tabs for 'What it will contain', 'Accessibility', 'Generated Record Data', and 'Portal Settings'. The 'What it will contain' tab is active, showing a 'Short description' field and a 'Description' field with a rich text editor. The rich text editor contains the following text: 'Raising an employee issue (grievance) involves formally documenting and reporting concerns related to workplace issues, unfair treatment, policy violations, or safety concerns. Employees should provide clear and accurate information about the issue, including relevant dates, details, and supporting information. A well-documented request enables HR or the appropriate department to investigate the concern, take necessary action, and ensure a fair and effective resolution.'
