

PHASE 6 – Creating Widgets and Adding Them to the Page

Employee Raise Issue – ServiceNow Project Documentation

Objective

Create custom Service Portal widgets and place them on the Employee Center portal page.

A. Left Widget – Commercial Widget

1. Navigate to Service Portal Configuration → Service Portals → Widget Editor.
2. Click Create a new widget.
3. Name the widget: Commercial widget.
4. Add the HTML and CSS provided in the project source.
5. Save the widget.
6. Use Enable Preview to verify the design.

HTML

```
<div class="commercial-widget">
```

```
<h2>Our Commercial Services</h2>
```

```
<p>We provide end-to-end IT services, support, and issue resolution through a streamlined Service Portal experience.</p>
```

```
<ul>
```

```
<li>✓ 24/7 Customer Support</li>
```

```
<li>✓ Faster Issue Resolution</li>
```

```
<li>✓ Transparent Tracking</li>
```

```
<li>✓ Secure & Reliable</li>
```

```
</ul>
```

```
</div>
```

Note

Paste the complete CSS from the project source into the widget's CSS section. It provides the gradient card, hover/floating effect, animated background, heading animation, and list-item animation.

B. Right Widget – Link Redirect

1. In Widget Editor, click Create a new widget.

2. Name the widget: Link redirect.
3. Add the HTML, CSS, and Client Script from the project source.
4. Save the widget and enable Preview.

Client Script Logic

The client script redirects the user to the Record Producer using its sys_id. Replace the value of RECORD_PRODUCER_SYS_ID with the sys_id of the Raise Employee Issue Record Producer.

Example:

```
function ($scope, $location) {  
  
    var c = this;  
  
    var RECORD_PRODUCER_SYS_ID = 'PASTE_RECORD_PRODUCER_SYS_ID_HERE';  
  
    c.openRecordProducer = function () {  
  
        $location.url(  
  
            'sp?id=sc_cat_item&sys_id=' + RECORD_PRODUCER_SYS_ID  
  
        );  
  
    };  
  
}
```

C. Add the Two Widgets to the Page

1. Navigate to Service Portal Configuration → Service Portals → Designer.
2. Open the Employee Center homepage/page.
3. Create a container using a 6 × 6 layout.
4. Search for the Commercial widget and Link redirect widget.
5. Drag and drop the widgets into the desired columns.
6. Save the page.

Expected Result

The portal page displays two custom widgets. The Link redirect widget opens the Raise Employee Issue Record Producer when selected.

Widget Editor

Widget Editor

Recently Updated

- Link redirect
- Commercial widget
- SC Shopping Cart Deprecated
- Faceted Search
- Homepage Search

Widget Editor is a development tool that allows you to view and edit the source code for existing widgets, create new widgets, and update a widget's option schema

- Check out the Hello World Example
- Create a new widget
- Edit an existing widget
