

PHASE 7 – Testing and Validation

Employee Raise Issue – ServiceNow Project Documentation

Objective

Perform end-to-end testing to verify that the Employee Raise Issue application, Record Producer, UI Policies, dependencies, and Service Portal work correctly.

Test Procedure

1. Open a new browser tab.
2. Navigate to the Employee Request Service Portal:
`/employee_request`
3. Verify that the portal logo/image and configured page elements are displayed.
4. Scroll to the custom widgets.
5. Move the cursor over the widgets and verify the hover/floating effects.
6. Click the Raise Ticket / Link button.
7. Verify that the Raise Employee Issue Record Producer opens.
8. Enter valid employee and issue information.
9. Verify Category/Subcategory dependency:
 - Network → VPN
 - Hardware → Laptop
 - Software → Server
 - Access → Forgot password
10. Verify that the Short description field becomes mandatory when State is New.
11. Verify that the Number field is read-only.
12. Submit the Record Producer.
13. Open the Employee raises issue table and confirm that the new record was created.
14. Verify that the mapped values from the Record Producer appear correctly in the created record.

Validation Checklist

- ☐ Portal loads successfully
- ☐ Custom widgets are visible

- ☐ Raise Ticket link opens the Record Producer
- ☐ Variables are displayed correctly
- ☐ Record Producer creates a table record
- ☐ Category/Subcategory dependency works
- ☐ Short description mandatory rule works
- ☐ Number field is read-only
- ☐ Record data is stored correctly
- ☐ End-to-end flow completes successfully

Expected Result

The complete Employee Raise Issue workflow operates as designed from the employee-facing Service Portal through backend record creation and form validation.

Raise Employee Issue

Raising an employee issue (grievance) involves formally documenting and reporting concerns related to workplace issues, unfair treatment, policy violations, or safety concerns. Employees should provide clear and accurate information about the issue, including relevant dates, details, and supporting information. A well-documented request enables HR or the appropriate department to investigate the concern, take necessary action, and ensure a fair and effective resolution.
