

PHASE 8 – Conclusion

Employee Raise Issue – ServiceNow Project Documentation

Project Title

Employee Raise Issue – Record Producer & Service Portal Integration

Project Summary

The Employee Raise Issue project provides a centralized and user-friendly self-service solution for employees to raise workplace issues through a ServiceNow Service Portal.

Key Implementation Areas

- A custom scoped Employee Center application was created.
- A custom Employee raises issue table was configured.
- Structured fields were created for requester, category, subcategory, description, state, priority, assignment group, and number.
- UI Policies were used to control mandatory and read-only behavior.
- Category and Subcategory dependency was configured to improve data accuracy.
- A Record Producer was created to provide a simple issue submission experience.
- A dedicated Service Portal was configured for employees.
- Custom widgets were developed and added to the portal page.
- The portal widget redirects employees directly to the Raise Employee Issue Record Producer.
- End-to-end testing was performed to validate the complete workflow.

Business Benefits

1. Standardized Issue Submission

Employees submit issues using a consistent structure and predefined choices.

2. Improved Data Accuracy

Choice fields and Category/Subcategory dependency reduce inconsistent data entry.

3. Better User Experience

The Service Portal provides a simple and accessible interface for raising issues.

4. Controlled Form Behavior

UI Policies enforce required fields and protect system-generated values.

5. Centralized Issue Management

Submitted issues are stored in a dedicated ServiceNow table for further processing and tracking.

6. Reduced Manual Effort

The Record Producer automates the creation of issue records from employee input.

Final Outcome

The implementation demonstrates an end-to-end ServiceNow solution in which employees can raise issues through a dedicated portal, while administrators receive structured records in the backend for management and resolution.
